

Software Engineer | Seeking Entry-Level Opportunities

✉ aya_hanzaz@outlook.com

Software Engineer specializing in Full-Stack Web Development.
I help companies throughout the end-to-end delivery of digital projects, from interactive user interfaces to deploying high-performance backend architectures.

Work experience

Graduation Internship (PFE)

From March 2025 to September 2025 [DXC Technology](#) Rabat

Recruitment Process Automation via Artificial Intelligence.

- Implemented a modular architecture featuring a **Python (Flask)** backend and a **MongoDB** database.
- Created smooth, interactive, and responsive user interfaces (Candidate & Recruiter modules) using **React.js**.
- Deployed Natural Language Processing (**NLP**) pipelines for resume parsing and integrated **DeepSeek LLM API** for automated interview generation.

Year-End Internship

From July 2024 to September 2024 [DXC TECHNOLOGY](#) Technopolis, Rabat

Development of an intern Management System.

- Developed a full-stack web application designed for administrative tracking and management of corporate interns.
- Engineered core business logic using Java and modeled robust data storage solutions using **MySQL**.
- Structured and modernized frontend interfaces using **Node.js** and **React.js** to enhance user experience (UX).

Technical Internship

From July 2023 to August 2023

[Ministry of National Education, Preschool, and Sports](#) Rabat

Budgetary Post Management Web Application.

- Built a dedicated web application aimed at streamlining the management of budgetary positions.
- Developed the backend infrastructure using **PHP** and integrated a **MySQL** database.

Specialized Technician Internship

From February 2022 to March 2022

[High Commission for Water, Forests, and Combating Desertification](#) Rabat

Internal Personnel Mission Management App.

- Designed an internal desktop application to manage and track staff field missions.
- Developed the user interface in **C#** and connected it to a **SQL Server** database.

Academic Projects

- Real-Time Facial Emotion Detection:** Developed an AI model for real-time facial expression recognition and classification via webcam using **Python, CNN, OpenCV, and TensorFlow**.
- University Management Application:** Built a comprehensive academic platform leveraging a microservices architecture powered by **Spring Boot, Angular, and Spring Batch**.
- Agricultural Yield Prediction:** Engineered a predictive model utilizing Machine Learning algorithms, including **Python, Random Forest, and XGBoost**.
- Job Search Engine:** Created a web platform to centralize and search job postings using **Python, Django, and HTML/CSS**.
- Currency Converter Application:** Developed a cross-platform mobile application consuming external REST APIs using **Flutter and Dart**.

Education

State Engineer's Degree in Computer Engineering

From 2022 to 2025 [Moroccan School of Engineering Sciences](#) Rabat

Specialized Technician Diploma in Software Development

From 2020 to 2022 [Specialized Institute of Applied Technology](#) Rabat

Social networks

 Aya Hanzaz

Skills

- Frameworks & Technologies:** Flask, Django, Spring Boot, React.js, Node.js, Angular, Flutter, Vite.
- Programming Languages:** Java, Python, PHP, C#, C++, JavaScript, Dart, SQL.
- Databases:** MySQL, SQL Server, MongoDB, Oracle.
- Artificial Intelligence:** Machine Learning, Deep Learning (CNN), NLP, LLMs, Fuzzy Matching, DeepSeek API.
- Tools & Methodologies:** Git/GitHub, Docker, Jira, Trello, Merise, UML.
- Testing :** Postman.

Certifications

- Neural Networks and Deep Learning** (Coursera)
- Java and Object-Oriented Programming**
- Oracle Database Administration**
- Intensive Vibe Coding Course with Google** (In progress)

Languages

Arabic
Native language
